WORK EXPERIENCE

Software Engineer @ Rithm School SIS

JULY 2021 // *San Francisco (Remote), CA*
- Designed and implemented new features and functionality for the Rithm Student Information System, working remotely with a team of 8 developers.
- Used **Test Driven Development** to add new features to the Student Information System (**Python/Django**). Development practices included stand-ups, storypointing issues, and researching codebase to facilitate the onboarding process.
- Contributions include: integrating external script for automated certificate creation and upload to *AWS S3* (with *reportlab* and *boto3)*, integrating oAuth for federated social login, customizing Django model methods for authentication, migrating database changes, & integrating the new features with Django views and templates

Freelance Content & Web Design

AUG 2015 - NOW// *Los Angeles, CA*

- Created marketing/creative content for local businesses and artists, including web design with Wordpress & Figma.

Operations/Office Manager @ Prepped, LLC

AUG 2019 - MAR 2021// *Los Angeles, CA*

- Oversaw operations for subscription meal kit e-commerce startup, including contractors/suppliers, production schedules & shipping/logistics
- Wrote **Python** scripts with **openpyxl** to automate production management tasks and decrease food waste.
- Designed and developed static HTML landing pages for new product launches and increasing SEO & digital content for existing products.

Lead Teacher/Program Coordinator @ Star Education

AUG 2018 - MAR 2019// *Los Angeles, CA*

- Coordinated an Early Childhood Aftercare Program with 4 staff members for non-profit with LAUSD.
